

Black & White Immunoplate Strip

(#31796/31896/31596/31696)

1. Description

SPL provides high quality products suitable for fluorescence and luminescence assays. Successful testing of SPL products have been performed in many research laboratories, results featuring high signal with low background.

- **White plates** : maximum reflection and minimum cross-talk for luminescence assay.
- **Black plates** : minimum light scattering and cross-talk during fluorescence assay.
- **Maxibinding** : Modified polystyrene surface for higher binding capacity for proteins and other molecules with both hydrophilic and hydrophobic regions. (Recommended for most ELISA experiments)
- **Unibinding** : Suitable for adsorption of hydrophobic molecules.(Antigen ELISA)
